Using oil levels is the most accurate way of measuring the volume of oil inside a fork. Oil levels are always measured with the stanchion and dampers fully compressed and with coil springs and spacers removed (where applicable) and is the 'air gap' between the top of the stanchion to the surface of the oil.

The best solution for display lights going out in Ford Explorers is to get a new DC to DC Converter, because this part was usually responsible for display malfunctions due to its own inherent design flaws. We offer our own brand of DC to DC Converter for Ford Explorers and many other Ford vehicles from the late 90's to the early 2000's.
