737-600/-700/-800 Component Locator Guide Spiral bound ...
Next-generation 737 airplanes (737-600/-700/-800/-900) feature a new, electronically based propulsion control system that almost completely replaces the hydromechanical systems used in earlier and current-generation 737 models (737-100/-200/-300/-400/-500). One of the principal differences is the addition of the electronic engine control (EEC), which continuously looks for and alerts flight crews to several levels of faults that could affect engine operation.

737-600-700-800-900 Propulsion Control System
The Boeing 737-800 is a stretched version of the 737-700. It replaced the 737-400. The Boeing 737-800 competes primarily with the Airbus A320. The 737-800 seats 162 passengers in a two-class layout or 189 passengers in a one-class layout. The 737–800 was launched on September 5, 1994.

Boeing 737 Next Generation - Wikipedia
Maintenance operations. 1 Components and Installations The 737-600/-700/-800/-900 propulsion controls look, feel, and work very much the same way as those of previous 737s, even though many components (and the way they operate) are completely different.
