series has been replaced by the C series. They have a rigid crankcase, a design which results in two advantages: first a reduction in deformations, and second a good main bearing alignment. The power output is from 1215-2005 kW. The engine is very robust and has proved popular in the offshore industry as well as on land-based power generation sites

The Rolls-Royce subsidiary was originally named Bergen Mekaniske Verksted (BMV) and was established all the way back in 1855. The factory began to manufacture diesel engines in 1946 and has - according to Bergen Engine - since then sold more than 7,000 engines, of which 4,000 remain in use today.
