Blender has two ways of calculating the unwrapping. They can be selected in the tool setting in the tool panel in the 3D Viewport. Angle Based. This method gives a good 2D representation of a mesh. Conformal. Uses LSCM (Least Squares Conformal Mapping). This usually gives a less accurate UV mapping than Angle Based, but works better for simpler ...

UV Tools — Blender Manual

The Blender source for the manual actually has a "make pdf" option, though the Blender documentation doesn't tell you that. I tried it and it did the first step OK, but then you need to run latex to actually generate the PDF and that step failed for me (in different ways) on bot the Mac and Linux.

Amazon.com: manual blender

The backdrop is the output of a Viewer node in the background of the Compositor. For example, when Shift-Ctrl-LMB on an Image node, it displays a preview of the image, or on a Mix node, will show the result of the mixing. You can toggle the backdrop by clicking the checkbox in the Backdrop panel title or by clicking on the Backdrop button in the header.

However, searches kept bringing up the Blender 2.80 Reference Manual. I found a place I could download a .zip of a .pdf of the 2.79 manual, but only after I registered. I believe that are many of us, who for various reasons, don't want to update to 2.8x yet. It's hard for me to understand why a pre-2.8x manual is not available.

Where can I get the Blender 2.79 manual? - Basics ...
