I had a similar problem in Windows 8.1 before upgrading to 10. While playing or watching a video, the sound went mute. To fix it I had to restart the sound service only to mute again after some minutes. I discovered that Windows Update had replaced my audio drivers and the new ones weren't very compatible with my audio card.

How do I fix my sound Solved - Windows 10 Forums

Once I ran out of forums to read, in desperation, I started reading comments on pages that didn't solve my problem. This fix seemed so ridiculous I almost didn't try it. Then, I didn't read very well and hit reboot. I still had static nonstop and I berated myself for thinking something so silly as start up buttons would fix my sound.

How To Fix Sound Distortion And Static In Windows 10
