Some of the parts that might need to be replaced are the brake calipers, brake hoses, ABS sensors and wear sensors. What is brake rotor resurfacing? Resurfacing or "turning brake rotors" is a process that can usually restore the surface on worn brake disc rotors to like-new condition, unless there are cracks, deep grooves, bad rust, hard ...

### Brake Rotors, Front & Rear Disc Brakes, Drilled Slotted Rotors

This fitting does need to be replaced if the vent holes are clogged but it IS NOT the culprit. Since this isn't actually a valve it doesn't control the flow, the piece you need to replace is on the backside of the engine compartment, follow the hose coming out after the throttle body (to the left of it) and track the V518 Distributor Vacuum piece.
